## SE 211 – Software Specification and Design II
## Winter 2017

## Assignment #2

Please write a program (in a language other than C++) to implement the Abstract Factory Design Pattern for the *computer store* problem, described on page 179 of your text (under the section ABSTRACT FACTORY). The corrresponding UML diagram is shown on Figure 6.1, page 180 of your text. Please note that the same UML diagram has also been included in the lecture notes.

**What, When, and How to Submit**

Please submit **via Blackboard** a .zip file containing the **source code** of your program, by Sunday, February 26, 2017, **11:59pm**.

There will be a 10% (absolute value) deduction for each week of lateness.
